Specific Examples of Quality Adjuncts

- In the social science program, Sharon Stansbury-Livingston has a Ph. D. from Georgetown University. She has taught philosophy at the college for the past five years. Kaylene Hughes has a Ph. D. in history from Florida State University. She is a full-time historian and curator of artifacts with the Redstone Arsenal.

- In the science program, Chris Davis has a master’s in meteorology. He is employed as the principal meteorologist for a local television station. Kevin Barnes has a Ph. D. in chemistry. He works full-time on the International Space Station Support Team at NASA’s Marshall Space Flight Center.

- In the math program, Larry Lechner has a master’s in math with 20+ years experience at Marshall Space Flight Center working as a mathematician. Adrian Seaver has a master’s in math from Virginia Tech with 4 years experience working at the Naval Surface Warfare Center and 6 years at Dynetics as a modeling and systems analyst. Terri Cavender has a master’s in math with 5 years experience verifying math algorithms for spacecrafts. Lynn Parker holds a master’s in math with 10 years experience analyzing math specifications and simulations.

- In the fine arts program, the college is fortunate to have access to artists and performers who work in the 12 art galleries and 11 theatre/playhouses in North Alabama. 43% of the fine arts faculty members have 15+ years of experience in their field. Some specific examples include: (1) Mary Crowell who has a doctorate in music composition with 20 years experience as a piano and composition teacher, professional musician, and recording artist; (2) Blu Smith who has a master of arts from Pratt Institute with 30 years experience as a professional artist and designer; and (3) Richard Wallace who has a master of arts in educational theatre from New York University. He has also performed professionally in New York City.
